This game has the best story I've seen in a game since Leisure Suit Larry or Undertale. Also, the ambiance in each world makes it feel so much more alive. I overcome various difficulties, traps and demons. What really sold me for this game was a lot of bosses, is different complexity of battlefield. Do yourself a favor and buy it now.. Short, easy, no story, no replayable.I bought it for 0'59u20ac I dont regret it but I cant recommend it.. Good story and ambiance. Slow, boring, and always starts in russian, some people might like this game but personally i think that even for 99p this game just isnt worth it
